## **DETAILED ACTION**

### **Election/Restrictions**

Applicant's election with traverse of Group I in the reply filed on December 23, 2010 is acknowledged. The traversal is on the ground(s) that Applicant asserts that Surdaslal is not prior art, and therefore cannot be relied on to break unity. This is not found persuasive because Surdaslal was not relied upon as prior art, but rather to show that the peptide is naturally occurring, and therefore is not a contribution over the art. In fact, the peptide is non-statutory subject matter, being a product of nature.

The requirement is still deemed proper and is therefore made FINAL.

**Claims 13-16 and 18-23** are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on December 23, 2010.

Claims 10-12 and 17 have been examined on the merits.

### **Claim Rejections - 35 USC § 101**

#### 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

**Claims 10 and 11** are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. As discussed above, Surdaslal teaches that the instant peptide is naturally occurring, found in the *Conus monile* marine snail. As such, the claims are drawn to non-statutory subject matter.

**Claim Rejections - 35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 10-12 and 17** are rejected under 35 U.S.C. 102(b) as being anticipated by RAMU (Y.D. Ramu et al. 3<sup>rd</sup> International Marine Biotechnology conference. (1994), Abstract).

Ramu teaches the crude venom extract of *C. monile* was fractionated and administered i.p. into mice. As indicated in Surdasal, the instantly claimed peptide is obtained from *C. monile* venom, and would necessarily have been present in the venom of Ramu. Please note, since the Office does not have the facilities for examining and comparing Applicants' composition with the composition of the prior art, the burden is on applicant to show a novel or unobvious difference between the claimed product and the product of the prior art. See *In re Best*, 562 F.2d 1252, 195 USPQ 430 (CCPA 1977) and *In re Fitzgerald*, 619 F.2d 67, 205 USPQ 594 (CCPA 1980), and "as a practical matter, the Patent Office is not equipped to manufacture products by the myriad of processes put before it and then obtain prior art products and make physical comparisons therewith." *In re Brown*, 459 F.2d 531, 535, 173 USPQ 685, 688 (CCPA 1972).

**Claims 10-12 and 17** are rejected under 35 U.S.C. 102(b) as being anticipated by ANNADURAI (D. Annadurai et al. Proceedings of the National Seminar on Marine Biodiversity as a Source of Food and Medicine. (2002), Abstract).

Annadurai teaches the application of a pharmaceutical comprising *C. monile* venom to isolated frog heart. As indicated in Surdasal, the instantly claimed peptide is obtained from *C. monile* venom, and would necessarily have been present in the venom of Annadurai. Please

note, since the Office does not have the facilities for examining and comparing Applicants' composition with the composition of the prior art, the burden is on applicant to show a novel or unobvious difference between the claimed product and the product of the prior art. See *In re Best*, 562 F.2d 1252, 195 USPQ 430 (CCPA 1977) and *In re Fitzgerald*, 619 F.2d 67, 205 USPQ 594 (CCPA 1980), and "as a practical matter, the Patent Office is not equipped to manufacture products by the myriad of processes put before it and then obtain prior art products and make physical comparisons therewith." *In re Brown*, 459 F.2d 531, 535, 173 USPQ 685, 688 (CCPA 1972).
